PROFESSIONAL SUMMARY

Informatics Engineering student at Universitas Multimedia Nusantara with a strong interest in cybersecurity and networking. Possesses technical proficiency in Kali Linux, Burp Suite, Python, and C. In addition to my primary areas of interest, I also have experience in web development, including HTML, CSS, JavaScript, Node.js, and MySQL, covering both frontend and backend development. Experienced in teaching and mentoring students to achieve accolades, which has sharpened analytical thinking and clear technical communication skills. Quick to learn new tools and motivated to contribute optimally within a team.

PENGALAMAN KERJA

Math Course Teacher | Miss Susan Learning Center *February 2026 – Present | South Tangerang, Indonesia/Banten*

- Taught Mathematics, Science, and other subjects to elementary, middle, and high school students, tailoring the delivery of material to the students' level of comprehension.
- Mentored students to achieve gold and silver medals in mathematics competitions—measured by final olympiad results—through the preparation of advanced practice materials and problem-solving training.
- Simplified complex concepts into easy-to-understand steps.

ORGANIZATIONAL EXPERIENCE

Logistics Division Member | Ready to Love 2025 *March 3, 2025 – May 16, 2025*

- **Managed logistics** and **inventory setup** for event equipment, ensuring the availability and good condition of physical devices used.

Security Division Member | Unity 2025 April 28, 2025 – October 4, 2025

- **Analyzed potential physical risks**, implemented **event security procedures**, and supervised crowd flow to ensure safety across the entire event area without incidents.

Logistics Division Member | BYTE 2025 *May 27, 2025 – December 4, 2025*

- **Managed the procurement** and **allocation of technical event equipment**, and ensured the timely readiness of facilities.

Events Division Coordinator | UMN Programming Club September 1, 2025 – May 13, 2026

- **Led the design of the technical flow** and **event run-down**, coordinated the team for **real-time problem solving**, and ensured that work programs were executed safely and in a structured manner.

EDUCATION

Universitas Multimedia Nusantara - Informatics Engineering *2024 - 2028*

GPA: **3.90** / 4.00

SKILLS & CERTIFICATIONS

Technical Skills (Hard Skills): Kali Linux, Burp Suite, Python, C, Web Programming (HTML, CSS, JS), Mathematics

Interpersonal Skills (Soft Skills): Communication, Adaptability, Analysis & Problem Solving, Public Speaking

Certifications & Training:

- **Introduction to Cybersecurity – Cisco Networking Academy |** Completed
- **Networking Basics – Cisco Networking Academy |** In Progress

Languages: Indonesian (Native), English (Professional Proficiency)

PROJECTS

Clinic Management Website — *Backend Developer (October 2025 – December 2025)*

- **Link:** https://github.com/GregoryWTz/ClinicWeb
- **Technologies:** Node.js, JavaScript, MySQL, Sequelize, HTML, CSS
- **Description & Contributions:**
  - **Core Problem/Feature:** Built a web-based clinic management system to help manage patient, doctor, appointment, and medical record data in an integrated manner.
  - **Technical Role/Actions:** Developed the backend using Node.js and Sequelize, integrating it with a MySQL database to handle data storage and management for the application.
  - **Impact/Result:** Delivered a functional web application capable of executing core clinic management workflows and securely connecting with the database for project requirements.

Servis.In — *Full-Stack Mobile App Developer (September 2026 – Saat Ini)*

- **Link:** https://github.com/vienyevelyn/ServisIn-App
- **Technologies:** Android Studio, Kotlin, Repository Pattern, MVVM, Git
- **Description & Contributions:**
  - **Core Problem/Feature:** My team and I developed the Servis.In mobile application prototype designed to connect users with certified home repair technicians. Currently in development, the platform features real-time booking, transparent pricing, and technician verification.
  - **Technical Role/Actions:** Responsible for developing the Booking Page and leading the code integration of all team members to produce a final publication-ready product.
  - **Impact/Result:** Successfully completed all code integration workflows and the Booking Page feature on schedule according to the project timeline.
